Nano 328P IO Wireless Expansion Board ARD2-2035

- Works with XBee Bluetooth Module for wireless functionality
- Breaks out the Nano's I/O pins
- External DC power supply terminal

Description

This Nano 328P Wireless Expansion Board is fully compatible with our Bluetooth XBee Arduino Module. It breaks out all the IO pins on a Nano and provides an external DC power plug that supports 7~12V input.

Specifications

Output Voltage	3.3V
I/O Pins	14 pins (servo type with GND, power & signal)
Analog Pins	8 pins with power output & GND
PWM Pins	6 pins
Expansion Pins	5 I2C Expansion Pins
Dimensions	60mm x 56mm x 15mm
