

Touch Sensor

ARD2-3020

- Detect touch inputs
- Built-in LED lights up when touch is detected

Description

This Touch Sensor module includes an LED. Build a simple circuit that lights up the LED when it detects a touch input.

Specifications

Voltage	5.0VDC
Chip	LM383
Channel	Single
Output	Single
Colour	Red
Material	PCB
Weight	3g

Pinout

Module	Arduino	Function
AO	A0	Analog Output
G	GND	Ground Connection
+	5V	Power Supply
DO	D3	Digital Output
