ARD 2 Arduino Compatibles
Controllers, Shields, Modules & Sensors

3 Pin Linker Cable 20cm   *CN3670*

- **Easily add & remove with Arduino modules & sensors without the hassle of soldering**
- **Ideal for use with ARD2-1030 I/O Expansion Shield**
- **Perfect for experimenting and prototyping, or for beginners and educational use**

Description

This cable will let you connect any 3-pin header on an Arduino sensor or module directly to any compatible plug/board, such as the ARD2-1030 I/O Expansion Shield. You can also use it to connect sensors and modules featuring a JST XH-style connector directly to any 3 adjacent Arduino I/O pins. It's perfect for experimentation & educational use. One end features a female pin header with three 0.1" sockets, while the other end has a JST XH style plug with three 0.1" pins.

Specifications

Pin Size	2.5mm (0.1")
Terminations	Female Pin Header/JST XH-style Connector
Length	20cm
