

Designed for Static and Dynamic Applications Such as Tank and Vessel Weighing

Crafted from either alloy steel or stainless steel, the i-TMF weighing module arrives pre-assembled for effortless installation. It is highly suitable for applications in tank weighing, level measurement, and vessel weighing systems.

Unique Features:

- Choose between alloy steel load cell with mounting kit or stainless steel load cell with mounting kit for static and dynamic applications. The self-centering rocker pin guarantees repeatability.
- 360° self-checking feature ensures comprehensive monitoring while lift-off and down stops enhance precision. i-TMF weighing module covers a capacity range from 10kg to 500kg.
- Simple installation options available for weighing module, allowing installation with or without load cell. Effortless maintenance - load cell is easily removable or installable with minimal lifting.
