Remote Control for Edison v2 Robot   RO-ED-REMOTE

- ▪ **Can be used with two Edison robots from one remote**
- ▪ **Supplied with CR2025 battery**

Using the Remote Control with the Edison Robot v2

Edison can respond to commands from the RO-ED-REMOTE control. See the attached barcode page to program your Edison Robot to respond to your remote control.

How to program your Edison using the bar codes and the RO-ED-REMOTE

- Place Edison facing the barcode on the arrow on the right
- Press the RECORD button (⬤) once
- Wait for the LED lights to come on,
- Then press the RECORD button (⬤) 2 more times
- Edison will drive over the bar code and stop
- While the red LED's on the Edison are still on,
- Point the remote at the Edison Robot
- Press the button on the remote control that you wish to use to program the barcode function
