### Product Description

The KSA series is printed board mounted AC output solid state relay. Small volume and built-in heatsink without affecting performance, with high surge current ability. Suitable for control electromagnetic valve, electric machine, filament lamp etc. The control input voltage is 5VDC, 12VDC and 24VDC. Opto-isolation between input and output, output is AC output random-on and AC output zero-on.

## Important Notice

1. Soldering must be finished within 10 seconds at 250°C, and finished within 5 seconds at 350°C.
2. Terminal polarity to ensure proper control, or may damage the product.
3. When the ambient temperature is over 40°C, load current performance will decline.
